

Cleaning instructions Doggy Daycare-kennels

1

Emptying the cages

- Make sure the dogs are in the cages outside before you start cleaning. Never just go into a cage with dogs!
- Remove all the stuff out of the cage.
- Remove the dog poop with a poop bag.
- Bring all the dirty and empty food and water bowls to the counter and clean them.

important

Before you start, check on the board which kennel(s) you have to clean.

Is there food left in the bowl? Check with a caretaker if this is old or fresh food.

important

Don't just pet the dogs and don't put your fingers through the bars of the cage!

Cleaning the cages

2

- Clean the floors, walls, waterbowls and if needed, the windows.
- Use 'regular' soap for cleaning.
- Use chloride to clean up diarrhea.
- Dry the mopped floors with a squeegee.
- Clean the drains.

3

Rearrange the cages

- Shake out the blankets and fold them neatly so they fit the dog's bed.
- Is the blanket really dirty? Bring it to the laundry and get a clean blanket for the kennel.
- Place toys and or bones back in the cage.
Note: don't put them *in* the bed, but on the floor.
- Place the food and water bowl back on the floor or in the brackets. Fill the bowl that is the furthest from the door with water.
- Check if everything is in the correct position and close the door.

important

Always check if the doors and hatches are closed!

Know that not all dogs can have blankets, toys and or bones in their cage.

important

Always follow the instructions of the caretakers. Need help? Feel free to call a caretaker!

Cleaning the hallway

4

- Clean the hallway, the gutter, the drains and the countertop.
- Get a new trashbag. Use the used trashbag for litter from the outside cages.

5

Cages outside

- Open up the hatches so the dogs can go outside. Then close the hatches again.
- Clean up the dog poop with a shovel. Throw it in the trashbag and clean the shovel with the waterhose.
- Repeat step 2, this time for the cages outside.
- Throw the toys that were outside before you started cleaning, back in the outside cages.
- Repeat step 4, this time for the hallway outside.
- Once the cages outside are clean, leave the hatches closed and throw away the trashbag.

important

Do you need help to get the dogs outside? Ask a volunteer or caretaker to help you!
